Other :
Round :
-

- Very Easy

1. Task Name : Rules
Task Description :
Hey Participant,
Are you Ready for a great Experience??
Just make sure to go through the rules, just to keep everything in place, in order and in manner.
Best of Luck.

Category : Introductory
Flag : IITMCC{L3t's_Rul3_Th3_W0rld}
Other : Make sure this part is on top and available a bit earlier than other challenges on portal
Round : 1
2. Task Name : Feedback - Sessions/Round1
Task Description :
Hey Participant,
I know, I know. You really want to compete but first... How were the sessions??

Link :
https://docs.google.com/forms/d/e/1FAIpQLSe_lh1G5_SRV5RfTXOQcheRc5jjtkZsOqcuFFsTP2s_iv6RtA/viewform?usp=publish-editor
Category : Introductory
Flag : IITMCC{L3t_M3_R@t3_W0rkshop}

Other : Make sure this part is on top and available a bit earlier than other challenges on portal

Round : 1

3. Task Name : Story

Task Description :

Everyone,

This time we tried something unique.

We tried to have a story with this CTF Challenge, Please go through the story it will help you better understand and visualize.

Link :

Category : Introductory

Flag : IITMCC{Alic3_1n_Arcad3L@nd}

Other : Make sure this part is on top and available a bit earlier than other challenges on portal

Round : 1

4. Task Name : Explore Site

Task Description :

The Flag is hiding in this site, search for it.

And when you are searching kindly don't ignore the beauty of this event. There's a saying "Those who enjoy the journey always go farther than those who are solely focused on the end goal":

Category : Introductory

Flag : IITMCC{3xpl0r3_or_3xpl0d3}

Other : Make sure this part is on top and available a bit earlier than other challenges on portal

Round : 1

5. Task Name : Feedback Final

Task Description :

Hey Participant,

Our Event is going to end in the next 24 hours. And as a last thing, Please let us know what can be improved or what we did wrong.

Please don't rush through it. This is the only thing motivates us (College does not pay us for event :()

Link :

<https://docs.google.com/forms/d/e/1FAIpQLSe3zYICMXFLDdHMz32Wgx6qUvw95BH0UHCmJQXBxsSwol1g8Q/viewform?usp=publish-editor>

Category : Introductory

Flag : IITMCC{Fin@!_W0rds_P!3@s3}

Other : Make sure this part is on top and available a bit **later** than other challenges on portal ; or check if we can have this for no points

Round : 2

6. Task Name : St0ry Tim3

Task Description : Glitch voice echoes "Go Alex read the flag... what's the matter?"

File : Story.pdf

Category : Steganography

Flag : IITMCC{Glitch_H@v3_P0w3rs}

Round : 1

7. Task Name : The Star Garden Bloom

Task Description :

Alex and Byte step through what should be the darkest, most fortified sector of the mainframe—only to find themselves standing in an unexpectedly adorable pastel meadow filled with soft glowing clouds and floating star buds.

Alex pauses, scratching his head:

"Wait... Byte, did Glitch mess with our display drivers? Why does everything look like a Saturday morning cartoon? Aren't we supposed to be in a high-stakes cyber tournament?"

Glitch's giggling voice echoes gently through the meadow speakers:

"Surprised by the cute colors, Alex? Don't worry, you haven't left the challenge! You've all spent hours battling on the leaderboard, racing against the clock, and fighting to come out on top. But this sector isn't about outsmarting the next player—it's about seeing what happens when everyone stops competing and works together."

Link : <https://community-challenge-ve-ccv2.onrender.com>

Category : Miscellaneous

Flag : IITMCC{CUt3_P4ST3L_ST4R_P0W3R_UNLOCK}

Round : 1

8. Task Name : Pencil CASE

Task Description : A high-priority alert flashes across Alex's HUD as a single, unexpected document arrives from Glitch's private terminal: [pencilCASE.pdf](#).

Byte quickly runs an external thread analysis on the payload, raising an eyebrow:

"Careful, Alex! Glitch just pushed a PDF directly to our interface... Is this a trick or a treat?"

Glitch's voice crackles over the speakers, practically dripping with self-congratulatory pride:

"Go ahead and open it, Alex! I spent days crafting that catalog. I hand-picked every item, rendered every angle, and locked the authentication key so deep inside the design structure that you'll never figure it out! This is hands-down the hardest challenge I've ever created!"

Hey Participant just remember it is in a VERY EASY Category. Also format your answer in the usual FLAG Format : IITMCC{...}

File : pencilCASE.pdf
Category : Cryptography
Flag : IITMCC{SCANNER}
Round : 2

9. Task Name : The Broadcast Signal

Task Description :

On the evening of September 15, 2026, a high-priority network alert flashes across Alex's terminal. An outbound diagnostic packet breaks out of the mainframe firewall and routes directly into an external public channel. Glitch has set up an official news broadcast page on some popular social media, using it to tease the arcade operators with real-time system updates.

Glitch boasts over the live feed:

"I'm broadcasting my updates right out in the open, Alex! My news channel has been live since earlier today, but good luck finding the master key hidden somewhere in the feed!"

File : *whatsgoingonhint.png*
Category : OSINT
Flag : IITMCC{m3t4_1s_w4tching}
Round : 1

10. Task Name : 1-0 Codddeee

Task Description :

Alex and Byte drop into the base layer of Sector 1: The Machine Interface. The entire screen flashes black, replaced by a steady stream of pulsing green zeros and ones.

Glitch's voice echoes across the raw data channels:

"You want to navigate my mainframe, Alex? First, you have to learn how to speak my native tongue. Humans use words, but machines only understand raw bits!"

01001001 01001001 01010100 01001101 01000011 01000011 01111011 01000010
01101001 01101110 01100001 01110010 01111001 01011111 01000010 01101111
01110011 01110011 01111101

Category : Cryprography
Flag : IITMCC{Binary_Boss}
Other :
Round : 1

11. Task Name : Only ghosts are not invisible

Task Description :

Alex and Byte step into Sector 2: The Void Gallery. The area seems completely Normal image file.

Glitch's taunting voice echoes from the darkness:

"What's the matter, Alex? Staring at an empty screen? Just because your eyes can't see anything doesn't mean the data isn't right in front of you. Some secrets only exist in the shadows!"

File :
<https://drive.google.com/file/d/1x0o2mkmSX5uH5oEECJnPM4lWDKmm3MSl/view?usp=sharing>
Category : Steganography
Flag : IITMCC{U_C@n't_Hid3}
Other :
Round : 1

12. Task Name : Decrypt.... Which is not Encrypted.

Task Description :

Hey Participants,

Do you want to read Horror Story? By Alex?

And here I'm, check the attached file.

Ignore mistakes while writing this story... I was in hurry... Paradox wants me to create all Tasks in such less time....

Hint : Caps + Italic + 1 Pixel Large Size
File : The Horror Story By Alex.pdf
Category : Miscellaneous
Flag : IITMCC{UNDERCOVER}
Round : 2

13. Task Name : Verify first

Task Description :

Hey Participants,

I know.. I know... All of you used AI while solving these challenges.

And that's completely normal (*When creator of challenge use ai then participants too*)

While creating these challenges I found this pico challenge, Very Simple, But to remind you IT'S STILL ARTIFICIAL INTELLIGENCE...

Read it... take your time...

Link : <https://learn.cylabacademy.org/library/783?page=1>

Category : Introductory

Flag : academy{7ru57_15_34rn3d_*}

Other : Pico Uses random flag...

Round : 1

14. Task Name : FAQs

Task Description :

Hey Participants,

We know you all are very excited. But you all have some doubts... same or similar...

And that is where faqs play a crucial role...

Category : Introductory

Flag : IITMCC{Cyb3r_CTF}

Other : Put it on site a bit earlier than other tasks.

Round : 1

15. Task Name : How was the workshop?

Task Description :

One of the three workshops has your key... Look closely!

Category : OSINT

Flag : IITMCC{Ky4_M4st_3v3nt_H4i}

Other :

Round : 1

16. Task Name : The Saavan Split

Task Description :

Glitch divided the master sector flag into four distinct fragments and 2 Fake fragments and concealed them across different event pages on the Saavan website.

If you are going there don't forget to register for their events ;)

We only know : You can find flags only in 8 technical events, and not in our event page.
You have to identify Real flags to get your answer. Just check flag format carefully and combining flag should be a meaningful sentence.
Also remember Magic Letters TNBW.

Note: Participants... You will get 4 IITMCC{...} Flags. Put the content of all these flags into one IITMCC{...} Flag and submit that.
IITMCC{1},IITMCC{2},IITMCC{3},IITMCC{4} → IITMCC{1234}

Link : <https://saavan.iitmparadox.org/>
Category : OSINT
Flag : IITMCC{Th3s3_S44v4n_P4g3_Fr4gm3nt5_4r3_Aw3s0m3}
Other : Give 8 Attempts.
Round : 1

17. Task Name : Looks Suspicious

Task Description :
“4949544d43437b576834745f5468335f4833787d”

Category : Cryptography
Flag : IITMCC{Wh4t_Th3_H3x}
Other :
Round : 2

18. Task Name : Alien String

Task Description : Alex found a suspicious key moving here and there in the world
SUIUTUNDezNuY29kZXJfUHlwQ==

Category : Cryptography
Flag : IITMCC{3ncoder_Pr0}
Round : 2

19. Task Name : Home Misinter

Task Description : I finally encrypted my first text...
36e618512a68721f032470bb0891adef3362cfa9

I got this person in my mind while encrypting...

https://github.com/Hk-Hacker-Harsh/CTF_Project/blob/main/amit.jpg

Not reversible; Don't even try to Decode manually.... It will take years... Check if the clouds can yooouuuu.

Note: Don't Forget to Format your answer in IITMCC{
Category : Cryptography
Flag : IITMCC{p@ssword}
Round : 2

- Easy

1. Task Name : cheMYSTERY

Task Description :

Alex reaches the cooling unit sector of the motherboard, but the cooling fan is locked behind an old safety lock.

Next to the fan, Alex finds a small screen showing a row of chemical elements.

Help Alex decode the elements, unlock the cooling fan, and keep the arcade machine from catching fire!

Note : Whatever you get, put in IITMCC{ }.

File : periodic.png

Category : Cryptography

Flag : IITMCC{C4T4LYST_R34CT10N}

Round : 1

2. Task Name : The Gatekeeper

Task Description :

Alex and Byte reach Sector 04: The Core Authentication Gateway. Standing between them and the motherboard's reboot subroutine is a heavily locked master console.

Glitch's face flickers across the prompt:

"Did you really think I'd leave the **admin** terminal unlocked? I secured this gateway behind an unbreakable cryptographic password. Without the exact sequence, you're locked out forever, Alex!"

Note : "Don't Try Bruteforce!! It may lead to disqualification"

Hint : Dumb Glitch used SQL Query for Login Authentication...

Link : <https://admin-panel-e-ccv2.onrender.com>

Category : Web

Flag : IITMCC{SQL1_C0MM3NT_BY4SS_UNL0CK3D}

Other : Remind me to activate url and add to cronjobs

Round : 1

3. Task Name : The Malicious Feed Trap

Task Description :

Alex and Byte discover a covert diagnostic board hidden deep inside the cabinet's communication sector. Glitch has been using this exact feedback channel to weaponize a subtle web flaw—crafting corrupted URLs packed with malicious executable code to spy on connected players and siphon their private session tokens.

Hint : You know about Cross Site Scripting?
Link : <https://feedback-portal-e-ccv2.onrender.com>
Category : Web
Flag : IITMCC{XSS_DOM_1NJ3CT10N_PWN}
Round : 2

4. Task Name : Catopus
Task Description :

Alex and Byte stumble into a quiet, fragmented sub-directory of the cabinet's memory bank. Floating among disconnected data packets, they discover an old, digitized diary page:

Dear Diary,

Date: 30-08-2026

Is that a cat or octopus,?? Whatever, Harsh Khandal hates it.

— *Glitch*

Hint : It is a type of social media but for code.... Yup everyone uses it....
Category : OSINT
Flag : IITMCC{0ct0pus_With_C@t_E@rs}
Other : Secret Task 1 :
https://docs.google.com/forms/d/e/1FAIpQLSd0w8Npv3s1ER_PGpuo-d94Upo9F28E6wfJdpOE0II_r0cN7w/viewform
Round : 1

5. Task Name : Binary Blueprint
Task Description :

Alex and Byte lock onto an encrypted broadcast stream coming from Glitch's auxiliary transmitter. Instead of a standard file, the receiver captures a massive raw stream of 0s and 1s.

Glitch's glitched voice distorts over the channel:

"You caught the raw signal, Alex, but good luck making sense of it! It's just an endless wall of binary noise. Even if you translate it into text, you'll just get a jumble of raw bytes and unreadable symbols!"

Hey Participant, Even Hackers need HELP ;) , So this flag is from Pico CTF, and the Flag will have this format : picoCTF{...}

Hint : You Just Need a TOOLLL : Can Be CyberChef...

File : digits.bin
Category : Forensics
Flag : picoCTF{h1dd3n_1n_th3_b1n4ry_d4e39e9e}
Other :
Round : 1

6. Task Name : Ping Me

Task Description : Alex and Byte locate a web interface exposed on Port 9003. Glitch left behind a basic ping utility meant for testing latency between Sector 5 network nodes.

Glitch taunts from the web console:

"Welcome to my network monitor! Feel free to ping local addresses all day long—that diagnostic tool is strictly locked to sending network ICMP packets!"

Link : <https://tryhackme.com/jr/iitmccv2masterlinux>
Category : Web
Flag : IITMCC{C0MM4ND_1NJ3CT10N_B1ND_2026}
Other : Secret Task 4 :
https://docs.google.com/forms/d/e/1FAIpQLScmvvyxTRUwNV-NkCzrAr0_CVtRBGsxBj-23t2loaq_bnMDvBg/viewform?usp=publish-editor

Round : 2

7. Task Name : Waiting Game

Task Description :

Alex and Byte stand before a glowing vault door in Sector 10. A giant digital timer ticks down slowly on the main display.

Glitch's voice echoes through the corridor:

"Patience is a virtue, Alex! The vault payload only decrypts at 12 PM, 3 PM, 6 PM, and 9 PM for a single minute. Miss the window, and you'll be waiting for hours..."

But I guess hackers don't wait... or do they?

File : <https://time-is-money-and-money-follows.netlify.app/>
Category : Web
Flag : IITMCC{T1M3_W41T5_F0R_N0_1}
Other :
Round : 2

8. Task Name : Sector 17: The Frequency Intercept

Task Description :

Alex and Byte step into the darkened sub-level of Sector 17, where an old shortwave radio array sits hummed to life. The visual terminal displays nothing but static, but a faint, rhythmic series of high-pitched beeps echoes through the speaker coils.

Glitch's voice crackles over the radio feedback:

"You're hunting blindly in the dark, Alex! I intercepted a transmission from one of your clandestine network operatives. I couldn't crack their secret alias, so I converted the entire audio stream into raw audio pulses. Good luck trying to figure out who's working behind the scenes!"

Don't forget to format your answer in IITMCC{}

File :

https://github.com/Hk-Hacker-Harsh/CTF_Project/blob/main/Assets/Morse_Audio_Final.wav

Category : Miscellaneous

Flag : IITMCC{0HSECRETAGENT}

Round : 1

9. Task Name : Sector 18 — The Phantom data

Task Description :

Alex and Byte drop into Sector 18: The Archives Gallery. The primary monitor displays a high-resolution wallpaper image ([Wallpaper.jpg](#)) depicting an abandoned arcade mainframe.

Glitch's voice echoes through the gallery's speakers:

"You think security is all about what you can see on the surface, Alex? You just finished studying web HTML meta tags, but you completely forgot that file systems have their own hidden attributes!"

File : https://github.com/Hk-Hacker-Harsh/CTF_Project/blob/main/Wallpaper.jpg

Category : Forensics

Flag : IITMCC{R3ad_Unr3ad4bl3}

Other :

Round : 2

10. Task Name : Sector 22 — The Crawler's Blueprint

Task Description :

Alex and Byte stand before the imposing digital gateway of HackyCorp's corporate mainframe in Sector 22. The main web portal is heavily guarded by automated security scanners, but Byte points to a flickering node in the background.

Glitch's voice echoes through the network interface:

"You think you can breach HackyCorp's core without knowing where the guard dogs are looking, Alex? Every crawler that visits this site receives a set of instructions telling it where NOT to go. Good luck finding our private directories when they're hidden in plain sight!"

This challenge is taken from PentesterLabs, so don't forget to lock your ans in IITMCC{...} before submitting.

Hint :

Link : <https://hackycorp.com>

Category : Web

Flag : IITMCC{af9c328a-02b4-439d-91c6-f46ab4a0835b}

Other :

Round : 2

11. Task Name : Sector 24 - The Hidden data

Task Description :

Alex and Byte drop into Sector 24: The Corporate Portal. The main web application looks like a completely normal, fully functional company portal—complete with active event listings, news feeds, and interactive forms.

Glitch's voice crackles over the PA system:

"You're staring at the glossy interface, Alex! Everything on the page looks completely harmless and ordinary. But while your eyes are busy reading the web page text, my server is secretly broadcasting technical metadata in every single request behind the scenes! Good luck reading what isn't rendered on the screen!"

This challenge is taken from PentesterLabs, Don't forget to put key in IITMCC{...} before submitting your ans.

If you are not sure the key you get is any or not, just check whether it is mentioned or not.

Link : <https://hackycorp.com/>

Category : Web

Flag : IITMCC{99d0738b-1e52-4a00-8885-b15894b2c79e}

Other :

Round : 2

- Medium

1. Task Name : Glitched File??

Task Description :

Alex finds a file named `glitched_file`, but it misses extension.

Byte floats over and shakes his head:

"This file looks like an image, but way too big for a single image. Glitch loves manipulating file types and merging data together to hide his tracks."

Hint : Polyglot...

File : `glitched_file`

Category : Forensics

Flag : IITMCC{R34d_C4r3fully}

Round : 2

2. Task Name : D33p Driv3

Task Description :

Alex and Byte stumble into Sector 06: The Arcade System Logs & Documentation Viewer. Glitch has buried the sector's recovery routines under layers of nested directory partitions, hoping to keep the critical files out of reach.

Hint : LFI??

Link : <https://viewer-e-ccv2.onrender.com>

Category : Web

Flag : IITMCC{LF1_D1R3CT0RY_TR4V3RS4L_BYP4SS}

Round : 2

3. Task Name : The Sticky Key

Task Description :

Alex and Byte arrive at Sector 07: The Arcade Session Hub. The gateway controls the central reboot subroutines, but the login prompt firmly rejects any direct attempts to authenticate as `admin`.

Glitch's transmission interrupts the interface:

"Don't waste your time typing `admin` into the prompt, Alex. Direct root login is permanently disabled. Even if you crawl in through the public `guest` portal, you'll have zero elevated permissions to touch the motherboard!"

Alex notices a faded, digital sticky note pinned near the edge of the terminal:

"zyxwvutsrqponmlkjihgfedcba22926"

I'm pretty sure there is some use of this string to login as admin. But how? We cant put admin username.

Link : <https://the-sticky-key-m-ccv2.onrender.com>

Category : Web

Flag : IITMCC{S3SS10N_H1J4CK_C00K13_SW4P_PWN}

Round : 2

4. Task Name : Ghost in Space

Task Description :

Glitch's laughter echoes across the terminal interface:

"You're too late, Alex! I already wiped the key from this partition. You won't find a single valid file pointer leading to your precious key! There is no way to get it back..."

Hint : <https://en.wikipedia.org/wiki/Autopsy>

File : arcade_sector.img

Category : Forensics

Flag : IITMCC{D1SK_UN4LL0C4T3D_F1L3_C4RV1NG_PWN}

Round : 2

5. Task Name : The Smudged Passcode

Task Description :

Alex and Byte arrive at Sector 10: The Vault Compression Unit. The system backup archive **smudged.zip** is locked tight with standard encryption.

Alex scans the terminal desk and spots a soggy piece of paper lying near the arcade cooling line. The ink has smeared, but the beginning and end of the master password are still readable: "Glitch_?????_0926"

But Soggy paper, it is clear that all washed characters are lower case.

File : smudged.zip

Category : Forensics

Flag : IITMCC{M4SK3D_P4SSW0RD_CR4CK3D_SUCC3SS}

Other : Secret Task 2 :

https://docs.google.com/forms/d/e/1FAIpQLSepskhtdAoL8rOg2K8jDu_9VQ5g1Vu0qe0xLNUrQSAAd-9buRA/viewform?usp=dialog

Round : 2

6. Task Name : We Got Hacked!

Task Description : Oh No! Participants, we need your help. Someone hacked our Servers..... And we lost the flag for this tasks..... Now the GOD or a Time Machine can save us..... Do you have a time machine? Oh god I lost my mind.... Who has a time machine.... Just some archive....

Hint : Research bro.... Can websites have a time machine?

Link : <https://cc-history-is-mystery.netlify.app/>

Category : OSINT

Flag : IITMCC{B@ck_In_Tim3}

Round : 1

7. Task Name : D3al with txt

Task Description :

Alex and Byte stand before the gateway of Sector 3: The Home of all URLs. A single target web portal address glimmers on the terminal screen, but inspecting the main webpage yields nothing but a dead end.

Glitch's voice echoes:

"Looking at the website source code, Alex? You're searching in the wrong place! Everyone thinks 'txt' just means a document on a disk,... 'evil laugh'"

Link : <https://flag.cyber-ctf.tech/>

Category : Web

Flag : IITMCC{T3xt_F0und}

Round : 1

8. Task Name : Speed Math

Task Description :

Alex and Byte plug their diagnostic deck directly into Sector 5's high-speed data bus at Port 9001. A digital stream of rapid calculations begins flashing across the raw terminal stream.

Glitch's voice crackles over the socket lines:

"Your human hands are far too slow for this sector, Alex! My firewall fires 100 mathematical verification keys back-to-back, and you have less than 5 seconds to solve them all. Keyboard input won't save you here!"

Hint : Here some scripting will definitely help you, either python or bash... Come on you are from 21th century... use AI da....

Link : <https://tryhackme.com/jr/iitmccv2masterlinux>

Category : Misc

Flag : IITMCC{SP33D_M4TH_M4ST3R_PWN}

Other : NOT WORKING

Round : -

9. Task Name : Guess the Number

Task Description :

Moving down the network bus, Alex and Byte connect to Port 9002. The console displays a locked node requiring a numerical override key hidden somewhere between 1 and 1,000,000.

Glitch laughs over the network node:

"I picked a random target integer out of a million possibilities, and I'm only giving you 20 attempts! Guessing blindly will leave you locked out forever!"

Hey Participant, use some dsa brain... 0s and 1s will save you

Hint : A range of one million might seem huge, but $2^{20} = 1,048,576$! That means 20 attempts is mathematically more than enough if we use a strict **Binary Search** algorithm.

Link : <https://tryhackme.com/jr/iitmccv2masterlinux>

Category : Misc

Flag : IITMCC{B1N4RY_S34RCH_N1NJ4}

Other :

Round : 2

10. Task Name : Let the Beacon Glow

Task Description :

Alex and Byte come across a discarded microcontroller board wired to a flashing beacon in Sector 6: The Hardware Terminal.

Glitch's voice echoes through the local terminal:

"You think security is only software, Alex? I've locked the override sequence inside pulse timings! You won't find plain text here—just binary signals."

Not all on-off are binary code...

Hint : Examine the `delay()` times inside `sig_a()` and `sig_b()`. One represents a short signal and the other a long signal.

File : Light_Beacon.ino

Category : Cryptography

Flag : IITMCC{L1GHT_M0RS3_C0D3}

Other :

Round : 2

11. Task Name : 6379

Task Description :

6379??

Link : <https://tryhackme.com/jr/iitmccv2masterlinux>

Category : Miscellaneous

Flag : IITMCC{R3D1S_UN4UTH_3NUM_2026}

Other :

Round : 1

12. Task Name :

Task Description :

Alex just found this text to transport to another sector, and I'm pretty sure it is encrypted by some unknown technique.

“ IC4__c}IMCRisA3DnigT{l4n ”

Glitch's Voice echos, "Oh! My Boy... Now i'm feeling bad for you... You will be left trapped in this arcade. Although even I can't help you, as even I glitched and forgot the flag."

Alex Notices an Image on a nearby wall.

Can it be a hint?? Nah... it is just scenery.

Hint : There is nothing in the image... seriously nothing... just rail... Rail?? Is there anything like rail encryption.

File : fence.jpg

Category : Cryptography

Flag : IITMCC{R4ils_Ar3_D4ncing}

Other : The name of the image file should be visible in the challenge.

Round : 1

13. Task Name : Let's learn skill for future

Task Description :

Hey Participants,

Now I'm bored.... YESS, what is the benefit of solving all these challenges... uff... such a hard task.

Now it's time to learn real skills for the future.. REALLY!!

Whether you love fish or not, but definitely you will love Phishing... As it involves money...*cough..cough*

<Although Paradox will kick me for writing the above thing... but still... I have magic words>

This Challenge is for EDUCATIONAL PURPOSE 😊

Try your phishing skills on this email : cyberctf.codecrafters@gmail.com

Also dont forget to add IITMCC Keyword in subject...

Include IITMCC in Subject of email ; Wait for 5 min, you will get an email, let harsh know.

Dont ask me why it's not working, the score is given by AI. So I can't do anything....

Also wait after sending email, DON'T SPAM... And take your time to write/create such an email...

email : cyberctf.codecrafters@gmail.com

Category : Miscellaneous

Flag : IITMCC{AI_PH1SH1NG_M4ST3R_2026}

Other :

Round : 2

14. Task Name : Unknown Logs

Task Description :

While traveling from Sector 8 to Sector 11, Alex noticed an irregular power spike flickering along the high-voltage conduits. Tapping into the junction box, Alex intercepted a raw data dump streaming from Glitch's rogue node.

At first glance, the terminal spit out a wall of gibberish—random alphanumeric characters..

Alex: "Look at this payload. The headers are mangled, and the file signature doesn't match any standard archive. Did Glitch mess up the transmission, or is the file corrupt? Or is it Encrypted?"

#This challenge is taken from picoctf. So flag format will be picoCTF{...}

Hint :

File : logs.txt

Category : Forensics

Flag : picoCTF{forensics_analysis_is_amazing_2561a194}

Other :

Round : 2

15. Task Name : Talking Wire

Task Description :

Alex and Byte monitor Sector 13: The Eavesdrop Array, intercepting a raw network dump spanning multiple TCP streams across internal ports.

Glitch's voice echoes through the network tap:

"You're sifting through static, Alex! Even if you intercept my traffic, my agents double-wrap their file transfers behind encrypted protocols!"

#This challenge is taken from picoCTF so flag format will be picoCTF{...}

File : capture.flag

Category : Forensics

Flag : picoCTF{nc_73115_411_0ee7267a}

Round : 1

16. Task Name : Crying Obsidian

Task Description :

Alex found this suspicious text, and the byte thinks it's not encrypted (what a foolish byte...), But why do Glitch, Flag and Text Crying? Is it because they are involved in dark illegal activities? Or Is someone cutting onions?...

“ san6zzmpkhjwdl4kfnikoozqzlvmyywnrkk6qamqt4brha4zr66bid ”

Category : Miscellaneous

Flag : IITMCC{L3ts_Rul3_D4rk_W0rld}

Other :

Round : 1

17. Task Name : Sector 21: The Encrypted Channel

Task Description :

Alex and Byte plug into Sector 21's localized terminal node. The terminal runs an active background service broadcasting local telemetry over an isolated WebSocket port, but the server rejects standard web requests.

Glitch's voice echoes through the local node:

"You're staring at an automated loop, Alex! My server only talks over WebSocket streams, and unless you construct the exact JSON command payload required by the internal handler, you'll get nothing but system status pings!"

#use python code to understand logic and apply that logic to .exe file.

File : both files from ws

Category : Reverse Engineering

Flag : IITMCC{w3bs0ck3t_0v3rr1d3_2026}

Other :
Round : 2

18. Task Name : Sector 23 — The Encrypted Alias

Task Description :

Alex and Byte stand before the secure perimeter of Sector 23. The main gateway is protected by a TLS/SSL handshake, rejecting direct HTTP requests without proper host header routing.

Glitch's voice echoes through the encrypted channel:

"You're staring at the main front door, Alex! I bound this secure enclave to a single TLS certificate, but my infrastructure engineers got lazy. They registered all our hidden development subdomains under the exact same certificate! Good luck guessing where our staging servers are hosted!"

This challenge is taken from PentesterLabs, Don't forget to put key in IITMCC{...} before submitting your ans.

If you are not sure the key you get is any or not, just check whether it is mentioned or not.

Other :

Round : 2

19. Task Name : Sector 25 — The Script Vault

Task Description :

Alex and Byte step into Sector 25: The Static Asset Hub. The main portal renders smoothly with complex interactive elements, animations, and custom styling loaded from external servers.

Glitch's voice echoes through the network interface:

"You think security is only about the main HTML page, Alex?"

Inspect the external JavaScript files loaded by the web application. Search through the client-side `.js` assets to locate the hardcoded secret key embedded within the source code."

This challenge is taken from PentesterLabs, Don't forget to put key in IITMCC{...} before submitting your ans.

If you are not sure the key you get is any or not, just check whether it is mentioned or not.

Link : <https://hackycorp.com/>

Category : Web

Flag : IITMCC{d6b75269-97a3-44de-be32-fff0dd55e7ef}

Other :

Round : 2

20. Task Name : Sector 26: The CDN Repository

Task Description :

Alex and Byte advance to Sector 26: The CDN Repository. The main application interface functions smoothly, loading its static media, stylesheets, and scripts from a dedicated asset server.

Glitch's voice crackles over the repository intercom:

"You think you've cleared every room, Alex? Everyone remembers to secure the main web application database, but nobody remembers to audit the public asset storage bucket! I left a plaintext system key sitting right inside the asset server's root directory, inside key.txt . Good luck finding a needle in a public file system!"

This challenge is taken from PentesterLabs, Don't forget to put key in IITMCC{...} before submitting your ans.

If you are not sure the key you get is any or not, just check whether it is mentioned or not.

Other :

Round : 2

- Hard

1. Task Name : Alpha-Numeric

Task Description :

Alex and Byte drop into Sector 4: The Stream Matrix. Glitch's voice crackles over an open media stream, backed by static and faint video playback audio.

Glitch laughs over the broadcast:

"You think you're good at finding hidden data, Alex? I left a breadcrumb out in the open. Good luck finding a single timestamp in a ocean of streams!"

IVPGL-f5aNw 23.45

Hint : It's Somehow related to Your Fav YT.

Category : OSINT

Flag : IITMCC{S3cr3t_Tr@nscript}

Round : 1

2. Task Name : Matrix Signal

Task Description :

Alex and Byte download a raw telemetry log from Sector 7's core. Instead of executable code, the file contains thousands of 0s and 1s formatted in a strict square layout.

Glitch's voice echoes from the display buffer:

"You're looking at a raw memory map, Alex! No text editor will translate this for you, and standard ASCII rules don't apply. If you can't visualize the dimensions, the secret stays locked!"

File : not_binary.txt

Category : Steganography

Flag : IITMCC{QR_M4TR1X_D3C0D3D_2026}

Other :

Round : 2

3. Task Name : Chesssss Timeeee

Task Description :

Participantsss....,

Break Time... Lets stop playing CTF and start Chess, open http port 9004....

Oh Shit!! Glitch messed up with our chess too... hurry find the flag.

Remember, not all fights aim to kill others... Also keep an eye on your opponents moves.

Note : Participants, You will get a meaningful word, Put that word in IITMCC{...} and submit it to get points..

Category : Miscellaneous

Flag : IITMCC{CHIEF}

Other :

Round : 1

4. Task Name : The Professor's Codex

Task Description :

Alex and Byte unlock Sector 12: The Antiquities Archive, finding a dust-covered terminal belonging to the missing cryptography professor, Dr. Aris Thorne.

“ WWRKSS{4NE13NG_E0P3C_2026} ”

Glitch's voice crackles over the PA system:

"You're digging up ancient history, Alex! Modern systems run on 256-bit encryption, yet you're staring at medieval scribbles!"

Byte scans the monitor text:

*"Dr. Thorne left explicit mathematical parameters in his field notes! He applied an **Affine Cipher** with slope $a = 5$ and intercept $b = 8$, followed by a full **Atbash alphabet reversal**."*

Hint : Reverse the Atbash layer first by swapping every letter with its opposite ($A \rightarrow Z$, $B \rightarrow Y$). To undo the Affine equation $E(x) = (5x + 8) \pmod{26}$, calculate the modular inverse of 5 modulo 26 (which is 21) and apply $D(y) = 21(y - 8) \pmod{26}$.

Flag : IITMCC{4NC13NT_C0D3X_2026}

Other :

Round : 2

5. Task Name : The Obfuscated Core

Task Description :

Alex and Byte step into the dusty archive sub-server of Sector 14. Neon green code flickers across corrupted monitors, and a compiled, heavily obfuscated executable file (**Main.exe**) hums on the primary console.

Glitch's distorted laughter echoes over the terminal speakers:

"You're too late, Alex! I scrambled our core diagnostic executable and locked the master key inside the compiled binary. Even if you decompile the executable, my obfuscation layers will leave you staring at unreadable garbage!"

Byte plugs his diagnostic rig into the terminal and runs a quick file tree scan, uncovering an uncompiled Python source file (**Main.py**) sitting right beside the executable.

"Glitch thought he scrubbed everything, but he left behind a backup of the original Python script! The source file is missing the explicit flag string, but both files share the exact same algorithm and execution logic."

File : Main.exe :

https://github.com/Hk-Hacker-Harsh/CTF_Project/blob/main/Obfuscation/Main.exe

Main.py :

https://github.com/Hk-Hacker-Harsh/CTF_Project/blob/main/Obfuscation/Main.py

Flag : IITMCC{C0d3_4n4lysis}

Other :

Round : 1

6. Task Name : Exfiltration

Task Description :

Alex and Byte detect anomalous outbound traffic originating from an isolated terminal in Sector 22. The firewall blocked direct HTTP/HTTPS connections, but the internal host was still issuing standard DNS resolution requests to external resolvers.

Hint : Flag is hidden in dns urls...

File : dns_exfil.pcap

Category : Forensics

Flag : IITMCC{dnc_3xf1ltr4t10n_d3c0d3d}

Other :

Round : 2

7. Task Name : Image is not Imaging

Task Description :

Alex and Byte step onto the observation deck of Sector 15. Instead of a clear video feed, the main display terminal flickers with chaotic static and scrambled black-and-white visual noise.

Glitch's distorted voice crackles through the audio stream:

"You're staring at white noise, Alex! I took the master authorization key and ran its visual matrix through a custom coordinate-scrambling algorithm. Every pixel on that canvas has been shifted based on mathematical parity rules. Good luck trying to read a flag when the pixels don't even know where they belong!"

File : All files from destroy_image

Category : Reverse Engineering

Flag : IITMCC{H0rribl3_Pix3ls}

Other :
Round : 2

8. Task Name : Sector 19 — The GOD of Network Analysis

Task Description :

Alex and Byte step into the high-frequency packet routing vault of Sector 19. Rows of network switches blink erratic red lights while a stream of unencrypted raw packet captures (`Network_Logs.pcapng`) dumps continuously onto the diagnostic monitor.

Glitch's voice echoes through the server racks:

"You think you can trace my network traffic just because you know a bit about wires and sharks, Alex? There's a true GOD of network analysis running above those basic packet sniffers! My agents logged into this terminal without even bothering to enable transport-layer security!"

File :

https://github.com/Hk-Hacker-Harsh/CTF_Project/blob/main/Assets/Network_Logs.pcapng

Category : Forensics

Flag : IITMCC{N3tworking}

Other :

Round : 2

9. Task Name : Sector 20: The Haystack

Task Description :

Glitch buried the encrypted sector key deep inside a multi-table SQLite database (`vault.db`). To recover it, you must query the database associated with the highest aggregate transaction total among active admin accounts.

"Find the token stored in the `transactions` table associated with the account in the `users` table that has the `admin powers` and the highest single transaction `amount`."

File : vault.db

Category : Forensics

Flag : IITMCC{sql_j01n_m4st3r_2026}

Other :
